Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

A drilled and cased well equipped with pump and motor, and piping through a totalizing flow meter and into a storage tank.

9. Estimated cost of works: \$100,000.00

10. Estimated time required to construct works: One year

(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 4 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

The water is to initially be used to explore for brines. Water use will include water for drilling exploration boreholes, constructing monitor wells, sampling water from boreholes, dust control for over 20 miles of access roads, and aquifer testing.

13. Miscellaneous remarks:

The amount of water requested is only sufficient for the exploration phase of the project. However, if the results of exploration demonstrate an economical deposit, then the water would eventually be used as a part of that required for exploitation of the deposit. There are no domestic wells within 2,500 feet of the point of diversion of this application.
